

Menlo Worldwide sets up part distribution for Embraer

Menlo Worldwide said it has been selected by Embraer, the world's leading manufacturer of commercial jets up to 110 seats, to operate a regional logistics hub providing dedicated service parts warehousing and distribution supporting the launch of Embraer's family of regional and executive jet aircraft in the Asia-Pacific market, including mainland China.

Under the contract, Menlo has established a dedicated, 24/7 operation at its existing Singapore regional logistics hub providing rapid response fulfillment to Embraer's Asia-based customers, and will maintain a complete inventory

of repairable, expendable and structural parts for Embraer's ER 145 and the 170/190 line of commercial jet aircraft. The integrated, turnkey programme incorporates warehousing, logistics, transportation management and technology services, including:

- Import customs clearance, local transportation of inbound shipments to Menlo's Singapore logistics centre, parts receiving, quality inspection and put-away

- Ambient and temperature controlled bulk, rack, shelf and security-controlled warehouse space for Embraer

- Management of more than 20,000 SKU's of aircraft

China Southern operates Embraer 145 passenger jet.

service parts, components and supplies, including repair and returns management

- Order fulfillment to include picking, packing and three levels of dispatch service:

The services also include regular, critical and AOG (Aircraft on ground) shipments, as well as management of transportation for all outbound service parts shipments, incorporating emergency expedite, regular airfreight, surface and ocean. Menlo will also be involved in the selection and management of Embraer-

approved freight forwarders and will provide technology systems for supply chain visibility, warehousing and transportation management, business metrics reporting and performance analysis.

Menlo's dedicated operations for Embraer are housed in a modern, multi-client logistics centre in Singapore's Airport Logistics Park Free Trade Zone. The facility and the business processes supporting the client incorporate "Lean" warehousing and distribution concepts and processes.
