

WAREHOUSE AND DISTRIBUTION MANAGEMENT

A culture devoted to continuous improvement

Every client has unique needs. At Menlo Worldwide Logistics we utilize established best practices to meet your specific needs while delivering the flexibility that's essential in today's volatile business environment. Whether your business requires a single warehouse, a multi-client warehouse or an end-to-end distribution solution, Menlo will meet the challenge. From physical location to postponement needs, inventory flows and transportation costs, Menlo implements solutions that give you the perfect combination of quality service and cost savings all while aligning our services and processes with your corporate culture and business strategy.

Lean philosophy

Lean principles permeate every aspect of the solutions we operate for your company. From operating and management processes to our design solutions, lean is at the core of it all. Our lean tools and techniques focus on eliminating non-value activities and improving flows and efficiencies. These tools include repeatable, documented processes, Kaizen, Value Stream Mapping and 5S, all of which are supported by technology that places information in the hands of the people who need it, when they need it. From the back office to the warehouse floor, every Menlo associate embraces the lean philosophy and is empowered to reduce waste.

Other capabilities and services include:

- Real-time inventory visibility
- Multiple picking methodologies
- Radio frequency data collection
- Custom bar-code label generation
- Inventory rotation and lot code management
- System-directed labor management
- Task interleaving
- Cluster picking
- Returns management

Design and operations technology

Menlo Worldwide Logistics uses network analysis and specialized tools to optimize your warehousing and distribution facilities. For warehouse layout design we use multi-dimensional modeling and schematics to pinpoint the ideal operating configuration and processes, giving you maximum productivity.

Get the Menlo solution

Menlo warehouse management solutions deliver supply chain competitive advantage to our customers through cost control, inventory management and process discipline. We can integrate the warehousing network with inbound/outbound transport, inventory planning and order fulfillment. Menlo's operating procedures for security and inventory management ensure our clients achieve 99.99% inventory accuracy, which reduces their costs and increases their ability to meet and exceed business requirements. When you work with Menlo, order processing cycle times are reduced, efficiencies are achieved and logistics are improved. That's the Menlo solution.
